Education

Scaler School of Technology (in collaboration with BITS Pilani)

- **Degree:** Provided by BITS Pilani
- **Duration:** 2023 - 2027
- **CGPA:** 9.17

Birla Institute of Technology and Science, Pilani (BITS Pilani)

- **Degree:** BSc in Computer Science
- **Duration:** 2023 - 2026
- **CGPA:** 7.62

Experience

SDE Intern at Wabby AI

- **Duration:** Jan 2026 – Apr 2026
- **Tech:** Next.js, React, GraphQL
- **Responsibilities:**
 - Owned development of the core real-time chat experience using GraphQL subscriptions.
 - Built modular frontend architecture handling caching, pagination, and re-render control.
 - Integrated authentication and embedded sign-up flows, collaborated on backend design decisions.
 - Developed foundational systems for an early-stage platform prior to public release.

Frontend Development Intern at Sing One Song, Inc

- **Duration:** Aug 2025 – Jan 2026
- **Tech:** React, TypeScript, Web and Mobile
- **Responsibilities:**
 - Implemented onboarding and core application flows across web and mobile platforms.
 - Built interactive game features integrated into the main product experience.
 - Performed production bug fixes, refactors, and codebase improvements.
 - Revamped the landing page UI, receiving positive stakeholder feedback.

Software Development Intern at Scaler Academy (InterviewBit)

- **Duration:** Nov 2024 – Apr 2025
- **Tech:** Java, Kotlin, Ruby, JavaScript, TypeScript, SQL, Android, Web
- **Responsibilities:**
 - Built and maintained an internal Android application for Business Development Associates (BDAs), integrating feedback into iterative feature improvements.
 - Optimized the app from syncs taking days long time to 90th percentile sync within 15 minutes.
 - Developed web and Ruby backend components to support internal tools and dashboards.
 - Implemented frontend features and interfaces using JavaScript/TypeScript for internal admin workflows.

Projects

GraphScript - Visual Scripting Ecosystem

- **Link:** <https://graphscript-labs.github.io>
- **Tech:** Python, React, TypeScript, CI/CD
- **Details:**
 - Designed a node-based visual programming language and execution runtime.
 - Built modular architecture with custom editors, tooling, and automated pipelines.
 - Worked on CI/CD for smooth integration and release handling across all 7 repositories.

Pilot - Low Context AI Model Coding Harness

- **Link:** <https://github.com/AttAditya/pilot>
- **Tech:** Python, Ollama API, AI Orchestration
- **Details:**
 - Built a harness for providing a structured interface and tools for AI models.
 - Worked on Low Context Open Source Local AI Model Orchestration to perform complex tasks.
 - Released the project as open-source and released to PyPI as "pilot-code".

Langex - Python Package

- **Link:** <https://pypi.org/project/langex/>
- **Tech:** Python, Packaging, PyPI
- **Details:**
 - Built and published a Python package to extend the language capabilities of Python to support paradigm extensions and additional features.
 - Implemented features for interfacing, data validation, singletons, and additional functionality to enhance Python Developer Experience.
 - Packaged and distributed via PyPI for public use.
 - Developed CI/CD pipelines for automated deployments.

PackedBerry - All Purpose Discord Bot

- **Link:** <https://github.com/attaditya/packedberry>
- **Tech:** Python, Discord API
- **Details:**
 - Developed and deployed a general-purpose Discord bot used across 25+ servers and userbase of 1000+.
 - Implemented features like moderation, fun commands, and utility functions to enhance server engagement.
 - Maintained and updated the bot based on user feedback and reliability for 6 months.

Skills

- **Languages:** Python, Java, JavaScript, TypeScript, SQL
- **Frontend:** React, Next.js, HTML, CSS
- **Backend:** Flask, REST APIs, GraphQL, Spring Boot
- **Systems:** Linux, Bash, Git, Basic CI/CD, Performance Optimization
- **Foundations:** Data Structures, Algorithms, OS, Networking, Distributed Systems

Achievements

- Top 1.1% on LeetCode (Rating: 2189, Guardian Level)
- 4-Star CodeChef (Max Rating: 1837)
- Hacktoberfest 2024 — 6 accepted PRs (Level 4)
- CodeChef 140D: Rank 44 / 18,000+ (Top 0.25%)
